Endangered and Threatened Wildlife and Plants; Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; availability of a final environmental impact statement and a draft record of decision.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), make available the final environmental impact statement (EIS) on the proposed revisions to the regulations for the nonessential experimental population designation of the Mexican wolf and our draft record of decision (ROD), under the National Environmental Policy Act of 1969, as amended. Our intended action is to revise the regulations established in our 1998 Final Rule for the nonessential experimental population of the Mexican wolf. We also propose to extend the authority of the Mexican Wolf Recovery Program's section 10(a)(1)(A) research and recovery permit to areas that are outside of the Mexican Wolf Experimental Population Area. In the EIS we analyzed the environmental consequences of a range of alternatives, including the Proposed Action and No Action alternative, for our proposed rule. The action would be implemented through a final rule, a revised section 10(a)(1)(A) research and recovery permit, and the provision of Federal funding.

DATES: We will consider comments received on or before December 27, 2014.

Comments submitted electronically using the Federal eRulemaking Portal (see

ADDRESSES) must be received by 11:59 p.m. Eastern Time on the closing date. We will issue a final ROD no sooner than December 27, 2014.

Background

On June 13, 2013 (78 FR 35719), we published a proposed rule to revise the existing nonessential experimental population designation of the Mexican wolf. That proposal had a 90-day comment period ending September 11, 2013. On August 5, 2013 (78 FR 47268), we published a notice of intent to prepare an environmental impact statement in conjunction with the proposed rule to revise the existing nonessential experimental population designation of the Mexican wolf. That notice of intent to prepare an environmental impact statement had a 45-day comment period ending September 19, 2013. On September 5, 2013 (78 FR 54613), we extended the public comment period on the proposed rule to revise the existing nonessential experimental population designation of the Mexican wolf to end on October 28, 2013, and announced a public hearing. On October 28, 2013 (78 FR 64192), we once again extended the public comment period on the proposed rule to revise the existing nonessential experimental population designation of the Mexican wolf to end on December 17, 2013, and

announced public hearings on the proposed rule to revise the existing nonessential experimental population designation of the Mexican wolf.

On July 25, 2014 (79 FR 43358), we published a revised proposed rule to the existing nonessential experimental population designation of the Mexican wolf and announced the availability of a draft environmental impact statement, the reopening of the public comment period, and the holding of public hearings. That proposal had a 60-day comment period ending September 23, 2014. We developed our final EIS after assessing and considering all comments both individually and collectively. Our response to the substantive comments that we received are provided as an appendix to the final EIS.
